

Management

ID Center *Beta*

Managing Access of ID Center Users in Samsung Cloud Platform

ID Center is a service that helps companies easily create and manage users on the Samsung Cloud Platform. Integrated with the existing Identity Provider (IDP) adopted by companies, it centrally manages access to resources at the project level.

Easy Access Control

Users within the organization can access multiple project resources through SAML (Security Assertion Markup Language) authentication.

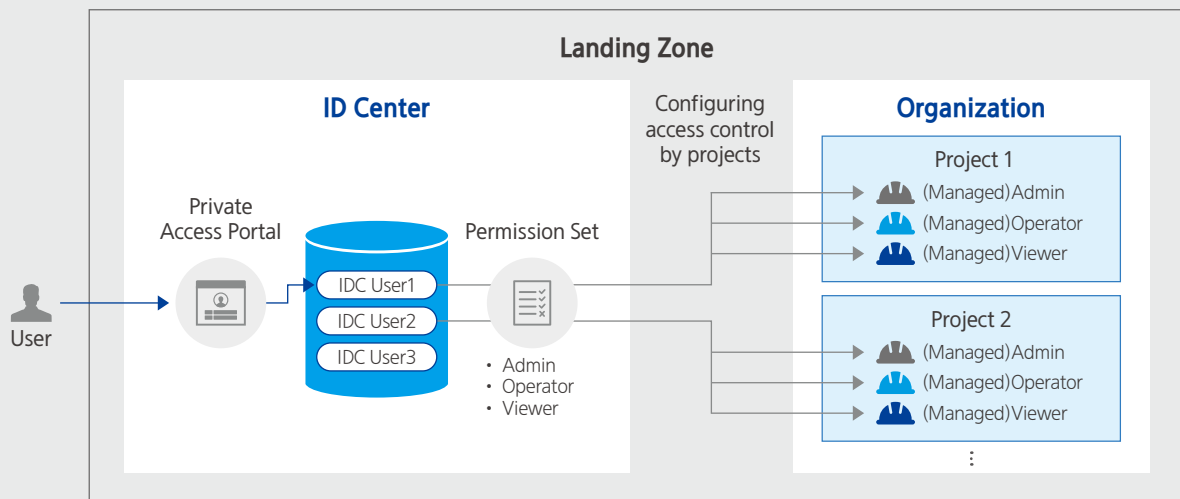

Effective Project Management

Permission sets assigned to ID Center users can be provisioned across various projects, which enhances visibility and enables systematic management of user access. Integrated with the Organization service, it centrally manages charges accrued by all projects and resources usage policies.

Strengthened Project Security

Through a separate access portal provided apart from the console login, ID Center users are allowed to access only the granted projects. This strengthens project security by limiting unauthorized access.

Service Architecture

Key Features

- **Integrated management of authentication data**
 - Accessing Samsung Cloud Platform using the existing IDP in-use or active directory based on SAML authentication
 - Configuring project-specific access control to ID Center users with permission sets
 - Supporting tenant-based access portal for users of an organization through ID Center setting
- **Efficient resource management**
 - Centrally managing access and permissions to various project resources through ID Center
 - Centrally managing charges accrued by all projects and resource usage policies in integration with the Organization service
 - Creating/managing ID Center users/groups through directory
- **Features/operations/technical support offered by service levels**
 - Service request is limited in the beta version. Please contact our sales team.
 - Directory and SSO integration not provided in the beta version

Pricing

- **Billing**
 - ID Center : Free of charge during the beta period (To be charged after the official release)
 - ※ ID Center is currently provided free of charge temporarily, and fees to be charged with one month prior notice
 - Prerequisite product : SingleID (Charged separately)
